

Tplink switch fiber optic to electrical port adapter

Overview

TL-FC111PB-20 is a 10/100 Mbps media converter with 802.3z 1000Base-SX standards, the MC200CM is designed for use with multi-mode fiber cable utilizing the SC-Type connector. High-quality metal casing ensures strength and reliability for a long time, maintaining a stable connection in a wide range. The SFP+ port is a high-speed optical-to-optical signal conversion port, mainly used for 10G Ethernet and Fiber Channel network applications. A key advantage of SFP+ Modules is that they are "hot-swappable", meaning they can be swapped out while the router is still powered on. They also support. □Convert Fiber to Ethernet□Designed to convert 1000BASE-SX/LX fiber to 1000Base-T copper media or vice versa. 3af PoE output makes remote camera deployment easier and more convenient. WDM (Wave Division Multiplexing) technology enables to transmit and receive data over one single fiber strand instead of two.
