

UPS Distribution Box Guide

Overview

This guide explains everything about UPS Boxes so you can understand what each packaging type is meant for, where it fits, and how to choose one without guessing. Key points Choosing the right UPS box affects both shipping cost and in-transit protection. It is the responsibility of the Shipper to ensure that proper packaging is used and that contents are adequately and securely packed in a container, wrapped, and cushioned for transportation. Use a rigid box with flaps attached, and do not exceed the maximum weight limit for the box (weight limits appear on the bottom flap). Seal and place bottles and containers in plastic. ackaging guidelines. From preparing small package shipments to palletizing your freight, we cover the basics on how to pack your shipments p operly and securely. From plug and receptacle charts and facts about power problems to an overview of various UPS topologies and factors affecting battery life, you'll find a wealth of pertinent resources designed to help you develop the optimum. Weight limits printed on the Box Maker's Certificate (found on the bottom flap of most boxes) are intended for palletized freight shipments, not for shipments through small parcel carrier environments.
