

What tax category does a power distribution box fall under

Overview

capitalized under § 263(a). This revenue procedure classifies transmission and linear property (for example, transformers, customer electric meters). As per the CBDT Circular 13/2021, TDS under section 194Q shall not be applicable in case of purchase of electricity from power exchanges. This change is particularly relevant for large industrial consumers. This table shows how Sage Sole Trader categories map to HMRC allowable expense boxes. Note on IRS Publications: Guidance on deducting electricity costs comes from general business expense rules for utilities found in IRS Publication 334 (Tax Guide for Small Business, 2024) and Publication 535 (Business Expenses). The activity of distribution of electricity by power distribution companies, to end consumers, is preceded by two important intermediate steps – namely production of electricity by power generation companies and its transmission from point of production to the point of distribution, by power.
