

## Wire shunt clips used in distribution boxes

### Overview

Sometimes referred to as "braided jumpers" or "power shunts," these products are designed to meet the carrying capacity for a wide range of power distribution applications. They provide a large cross-sectional area composed of braided copper connectors. REPAIR PERFORMANCE: Mechanically, the splice shunt is designed to restore 100% of the strength of the aluminum strands of ACSR and. Short lengths of conductor used to close, open, or bypass part of an electronic circuit. Jumpers are commonly used to configure electronics components, while shunts redirect current within in a circuiSycor Technology is your one-stop-shop for all your bus wire, braid, ground strap, shunt, and magnet wire needs! We distribute high-quality, easy to install products for various applications to a number of industries internationally. Having maintained long-standing partnerships with some of the. From power distribution and switchgear to solar energy and diverse industrial applications, American Power delivers high-quality, custom-designed laminated shunts and contacts tailored to your exact specifications. Developed for a major railroad as a safety-related solution to using the gold nut switch with a bad back. PLP transmission, distribution, substation, fiber optic, solar, and.
